Tech Tips

Read Your Statement Carefully

You may be asking "how does this relate to technology"? However, fraudsters count on the fact that many people don't check their monthly or quarterly statements carefully and won't question a transaction they don't recognize until it's too late. This is an easy way to safeguard your money and all it costs is a little time: **look at your statement as soon as you receive it**. This will be the first business day of the month if you get electronic statements, and about a week later if you still get paper statements. If there is anything on your statement you don't recognize, call us right away.
